III. DETAILED ACTION

Claims 1-9 and 32-62 are presented for examination. This rejection is based on the newly submitted amendment dated July 31, 2006. Because Applicant submitted two sets of claims dated 12-29-03, Examiner previously examined only claims 1-9 including 10-31 and not claims 32-62 . Therefore, this new rejection is based on two sets of claims. Claims 10-31 are now canceled.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, structuring a computer database drawn to knowledge base, classified in class 707, subclass 102 .
- II. Claims 32-62, drawn to data model table structure classified in class 707, subclass 104.1

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as without requiring the data model table structure of invention II. See MPEP § 806.05(d).

Art Unit: 2165

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Examiner attempted to contact Attorney Arnold M. de Guzman September 29, 2006 to request an oral election to the above restriction requirements, but did not result in an election being made because Attorney was unavailable.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Other Prior Art Made of Record

The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. U.S. patents and U.S. patent application publications will not be supplied with Office actions. Examiners advises the Applicant that the cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site (www.uspto.gov), from the Office of Public Records and from commercial sources. For the use of the Office's PAIR system, Applicants may refer to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197.
